

DERIN *Highlights*

→ Improved management and use of available water resources for domestic use

Biosand Filter

→ Farmer-preferred TARO varieties

"All sources of clean drinking water and even creeks have dried up due to the drought but we are getting clean and safe water purified by the biosand filter. Over 20 households have this technology."

- Peter Kunou, model farmer & Derin Councillor

"The health and hygiene of mothers and children in this community are important and we are thankful to NARI for providing us the technology."

- Alice Opam, model farmer
