

SIVIRI & MALAFAU

Highlights

Improved management and feeding technology for **POULTRY**

"I took interest and never turned back. Training on improved feeding and general management has helped me develop this ambition. Income from the sale of both egg and meat is good. Asians in Vila frequent my place for meat, which is encouraging."

- Shem Loh, Siviri model farmer

"My few chicken were left to scavenge before the project but now with improved feeding and housing, I'm seeing increases in weight and egg numbers; thus I pay more attention as they provide food and income. I use eggs in baking. Everyone in here loves my banana pie with egg."

- Lawiea Kanas, Malafau model farmer
